

EGISMOS *DATASHEET*

Standard 532nm DPSS High Power Green Laser Modules Key features

Visible light $\lambda=532\text{nm}$
Output power $<50\text{mW}$, $<100\text{mW}$
Dimension $20\text{mm} \times 60\text{mm}$
Stable Output Power

Applications

Green laser light source
Brighter visibility
Industrial alignment
Custom made requirement

Laser Diode Solutions

The 532nm DPSS High Power Green Laser Modules produce a collimated output beam with output powers of $<50\text{mW}$ or $<100\text{mW}$. Operating voltage is from 2.8V to 3.5V DC at an operating current of 300~600mA, 500mA typ.. Beam divergence is $<1.5\text{mrad}$ and operating temperature range is 15°C to 35°C . The modules consist of a aluminum housing, laser diode, crystal, drive circuit and collimating/focusing lens.

Electrical connections are made via external flying leads. The lens can be adjusted to produce either a collimated beam or fix focused spot. The compact design has made SC3532 series DPSS green laser modules suitable for most applications and easily modified for custom made requirements.

Egismos **DATASHEET**

Specifications (typical @tc=25°C)

Item.	symbol	SC353250R	SC3532100R
Mode		CW / TTL modulation (option)	CW / TTL modulation (option)
Wavelength	λ	532nm	532nm
Laser Pattern		Round	Round
Diameter x Length	$\Phi \times L$	20 x 60 mm	20 x 60 mm
Output Power	Po	<50mW, typ.40mW	<100mW, typ.80mW
Power Stability		$\leq \pm 15\%$ within operating temperature	$\leq \pm 15\%$ within operating temperature
Collimated Beam Size		<15mm at 10m	<15mm at 10m
Collimated Beam Divergence		<1.5mrad	<1.5mrad
Operating Voltage(DC)	Vo	2.7-3.5V	2.7-3.5V
CW Operating Current	Io	300~600mA, typ.350mA	300~600mA., typ. 400mA
Operating Temperature	To	+15°C to +35 °C	+15°C to +35°C
Storage Temperature		-40 °C to +85 °C	-40°C to +85 °C
Boresight(Coaxial)		option	option
Span Angle		--	--
Housing Material		Brass/Anodized Aluminum	Brass/Anodized Aluminum
Mean time to failure(MTTF)		>5,000 hrs	>5,000 hrs

Laser Safety

The light emitted from these devices has been set in accordance with IEC60825. However, staring into the beam, whether directly or indirectly, must be avoided. IEC60825 classifies laser products into three different categories depending on light emitted, wavelength and eye safety.

CLASS 2 / CLASS 2M

"Caution", visible laser light less than 1.0mW. Class 2M is for the spread laser beam, less than 1.0mW in 7mm aperture at 10cm distance. Considered eye safe, normal exposure to this type of beam will not cause permanent damage to the retina.

CLASS 3A

"Danger", visible laser light between 1.0mW and 5.0mW. Considered eye safe with caution. Focusing of this light into the eye could cause some damage.

CLASS 3B

"Danger", infrared (IR), and high power visible lasers considered dangerous to the retina if exposed. NB: It is important to note that while complying with the above classifications, unless otherwise stated, our laser diode products are not certified and are designed solely for use in OEM products. The way in which the device is used in the final product may alter its original design classification, and it is the responsibility of the OEM to ensure compliance with the relevant standards.
